Vision, mission and principles

OUR VISION

Sustainable Growth & Meaningful Business Value

“To become a globally recognized technology consulting and digital transformation partner, helping organizations use technology to create sustainable growth and meaningful business value.”

OUR MISSION

Transforming Challenges Into Practical Solutions

“To transform business challenges into practical technology solutions that improve performance, strengthen resilience, and create new opportunities.”

OUR GUIDING PHILOSOPHY

“Technology should simplify complexity.”

We operate at the intersection of business strategy, enterprise technology, artificial intelligence, automation, software engineering, cloud, and industry solutions. We believe technology must serve the business, not the other way around.

Business-First Thinking

We start with the commercial problem and organizational reality before recommending software.

Security by Design

Zero-trust defense, identity governance, and air-gapped resilience embedded into every layer.

Practical Innovation

We prioritize tested, dependable technologies over fragile algorithmic fads.

Long-Term Partnership

Implementation is not the finish line; we remain involved through continuous support and optimization.

Continuous Improvement

Iterative refinement of workflows and systems to extract compounding operational leverage over time.

Technology With a **Business Perspective**

Idowu Matthew

Founder & Technology Consultant

At the heart of Abrimatt is a simple belief: technology is most valuable when it solves a real business problem.

Matthew brings together experience across enterprise systems, SAP, software engineering, AI automation, cybersecurity, cloud technologies, and digital transformation to help organizations turn complex operational challenges into practical technology solutions.

His work focuses on connecting the pieces that businesses often manage separately—people, processes, applications, data, infrastructure, and intelligence—and creating technology environments that are easier to operate, scale, secure, and continuously improve.

“**Technology should serve the business, not the other way around.**”

IDOWU MATTHEW, FOUNDER & TECHNOLOGY CONSULTANT

One connected platform, six disciplines

Transform your business with connected enterprise technology, intelligent digital solutions, secure infrastructure, and industry-focused platforms designed around the way you work.

-  **Business-First Thinking**
We start with the commercial problem and organizational reality before recommending software.
-  **Security by Design**
Zero-trust defense, identity governance, and air-gapped resilience embedded into every layer.
-  **Practical Innovation**
We prioritize tested, dependable technologies over fragile algorithmic fads.

Five solution practices

Enterprise Business Solutions

SAP platforms for finance, supply chain, procurement, people and integration: S/4HANA and S/4HANA Cloud, Business One, ByDesign, Ariba, SuccessFactors and BTP.

SAP S/4HANA · SAP S/4HANA Cloud Public Edition

AI Automation & AI Agents

Turn repetitive processes into intelligent workflows, and build AI agents that work inside your systems, within limits you set and with human approval where it matters.

AI Agents · AI Automation

Digital Engineering & Commerce

Design and build modern digital products, business applications, APIs, e-commerce platforms, and connected digital experiences.

Custom Software · Web Applications

Infrastructure, Cloud & Cybersecurity

Build secure, reliable, scalable technology foundations across cloud, networks, infrastructure, cybersecurity, and managed IT.

Microsoft 365 · Microsoft Azure

Hospitality & Industry Solutions

Industry-focused technology platforms designed to solve operational challenges in hospitality, logistics, warehousing, and specialized environments.

StayQuora PMS · Cliq Restaurant Management

35 solutions and 18 services, planned as one

Each solution and service has a page of its own on our website, which says what it is, who it suits and who it does not.

Enterprise Business Solutions

CORE TECHNOLOGIES

SAP S/4HANA · SAP S/4HANA Cloud Public Edition · SAP S/4HANA Cloud Private Edition · SAP Business One · SAP Business ByDesign · SAP Ariba · SAP SuccessFactors · SeamlessHR · SAP BTP · SAP Customer Checkout

Abrimatt helps mid-market and growing enterprise organizations move from fragmented spreadsheets and disconnected tools to synchronized, automated enterprise architectures on SAP platforms, and helps them choose between SAP S/4HANA, SAP S/4HANA Cloud Public Edition and Private Edition, and the other SAP solutions we deliver, alongside SeamlessHR for HR and payroll.

Core ERP & Finance

S/4HANA · S/4HANA Cloud Public
S/4HANA Cloud Private · ByDesign
Business One

AI Automation & AI Agents

CORE TECHNOLOGIES

AI Agents · AI Automation · Intelligent Document Processing · AI Assistants & Copilots · AI-Enabled ERP · Process Automation

Traditional automation follows rigid, predefined rules. Abrimatt architects intelligent automation pipelines that combine machine learning, document understanding, workflow automation, and business rules into dependable workflows, and builds AI agents: software that takes a goal, uses your systems and carries a multi-step task through, with governance and human oversight designed in.

Agents & Assistants

Insight & Governance

AI Reporting AI Governance

Digital Engineering & Commerce

CORE TECHNOLOGIES

Custom Software · Web Applications · Mobile Applications · API Development · E-Commerce · Modern CMS

Rather than forcing organizations into rigid, off-the-shelf software packages that do not fit their operational reality, Abrimatt engineers bespoke software systems, modern web portals, cross-platform mobile apps, and high-throughput API integrations built for scalability and performance.

Applications

Software built for the way your business works: internal tools, portals and platforms, on the web and on mobile.

Custom Software

Web Applications

Mobile Apps

Commerce & Web Presence

Selling and being found online: e-commerce platforms for B2B and B2C, and websites with a content system your team can run.

E-Commerce

Websites & CMS

Integration & Modernization

Connect what you have and renew what is ageing: APIs and integration between your systems, and step-by-step modernization of legacy software.

APIs & Integration

Modernization

Infrastructure, Cloud & Cybersecurity

CORE TECHNOLOGIES

Microsoft 365 · Microsoft Azure · Power Platform · Sophos · Fortinet · Cisco · HP Servers

A modern enterprise cannot scale without a resilient, secure backbone. Abrimatt designs, deploys, monitors, and protects critical IT infrastructure across private, public, and hybrid cloud environments with zero-trust network defenses.

Cloud & Workplace

Microsoft Azure and Microsoft 365, designed, migrated and secured, with the Power Platform to build on top.

Cloud Migration

Microsoft 365

Security & Resilience

Defences for your networks, endpoints and identities, and backups and recovery plans that have been tested.

Zero-Trust Security

Backup & Recovery

Infrastructure & Operations

The networks, servers and storage your business runs on, and the monitoring and support that keep them healthy.

Networks

Servers & Storage

Managed IT Support

Hospitality & Industry Solutions

CORE TECHNOLOGIES

StayQuora PMS · Cliq Restaurant Management ·
Smart Warehouse & Logistics · IoT Tracking ·
Industry SaaS

Generic software often fails in specialized operating environments. Abrimatt delivers industry-engineered platforms tailored for hospitality operators, restaurant chains, and supply chain managers.

Hotels & Lodging

Reservations, the front desk, housekeeping and billing on one platform: StayQuora.

StayQuora

Food & Beverage

Orders, kitchen, tables and costing in one system, for restaurants and hotel dining: Cliq.

Cliq

Warehousing & Logistics

Barcode, RFID and sensor technology connected to your stock records.

Warehouse & Logistics

Advise, build, run: one team across the whole lifecycle

01 · ADVISE

Advise

Decide what to do, in what order, and why, before money is spent on it.

- ✓ IT Consulting
- ✓ Digital Transformation
- ✓ Technology Assessment
- ✓ Technology Planning
- ✓ Process Optimization

02 · BUILD

Build

Design, deploy and connect the platforms, software, automation and infrastructure.

- ✓ Software Development
- ✓ ERP Deployment
- ✓ SeamlessHR Services
- ✓ AI Automation
- ✓ Cybersecurity
- ✓ Network Infrastructure
- ✓ Cloud Services
- ✓ Systems Integration
- ✓ Business Intelligence
- ✓ Process Automation

03 · RUN

Run

Keep it healthy after go-live, and help your people use it well.

- ✓ Managed IT
- ✓ Application Support
- ✓ Training & Enablement

Eighteen services in all. Each has its own page on our website, with what is included, who it suits and how it is delivered.

Technology that fits the way your sector works

Manufacturing

Production, stock and finance on one set of numbers, from the factory floor to the management accounts.

Business One · S/4HANA

Retail & Distribution

One view of stock, sales and cash across every shop, warehouse and online channel.

Customer Checkout · Business One

Hospitality

Reservations, front desk, kitchen and accounts working from the same guest and room records.

StayQuora · Cliq

Professional Services

Time, projects and invoices connected, so that billing follows the work.

Business One · ByDesign

Financial & Corporate Services

Controls, audit trails and security you can show to a regulator, on systems that consolidate cleanly.

Zero-Trust Security · S/4HANA

Logistics & Supply Chain

Stock, dispatch and delivery records that follow the goods from receipt to the customer's door.

Warehouse & Logistics · APIs & Integration

Growing Businesses

A first proper system, chosen to grow with the business rather than be outgrown.

Business One · Managed IT Support

Not on the list?

Describe what is getting in the way, and we will help you work out what, if anything, technology can do about it.

The technology we work with

Fit before fashion

Secure by default

Open to connection

Supportable

Enterprise Platforms

Business software that brings finance, stock, supply chain, people and customers into one authoritative system of record.

SAP Business One · SAP S/4HANA · SAP S/4HANA Cloud Public Edition · SAP S/4HANA Cloud Private Edition · SAP Business ByDesign · SAP Ariba · SAP SuccessFactors · SeamlessHR · SAP Business Technology Platform (SAP BTP) · SAP Customer Checkout

AI & Intelligent Automation

Practical AI and rule-bound automation that take repetitive work off people, with a person still deciding what matters.

Intelligent Document Processing (IDP) · Enterprise AI Assistants & Copilots · Multi-Agent Workflow Orchestration · Business Intelligence & Predictive Analytics

Cloud & Productivity

Cloud infrastructure and collaboration platforms for a workforce that is spread across places and devices.

Microsoft 365 · Microsoft Azure · Microsoft Power Platform

Cybersecurity & Perimeter Defense

Layered defences for the assets, intellectual property and customer records of the business.

Fortinet FortiGate · Sophos Intercept X · Cisco Security

Infrastructure & Hardware

Compute, storage and networking, physical or virtual, that business platforms depend on.

HPE ProLiant & Apollo Servers · Cisco Enterprise Switching & Wireless · Air-Gapped & Immutable Backup Systems

Digital Engineering & Modern Web

Custom software, web and mobile applications and the interfaces between systems, built to be fast, accessible and easy to extend.

Modern Web & Mobile Frameworks · Enterprise API Gateways & Microservices · Relational & Analytical Databases

Our partners

Abrimatt is a Fortinet partner and a SeamlessHR partner.

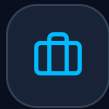

NETWORK SECURITY

Fortinet

Next-generation firewalls and secure SD-WAN, which we design, configure and maintain for clients.

Fortinet partner

HUMAN RESOURCES

SeamlessHR

HR and payroll software built for African businesses, which we set up, connect to finance and support.

SeamlessHR partner

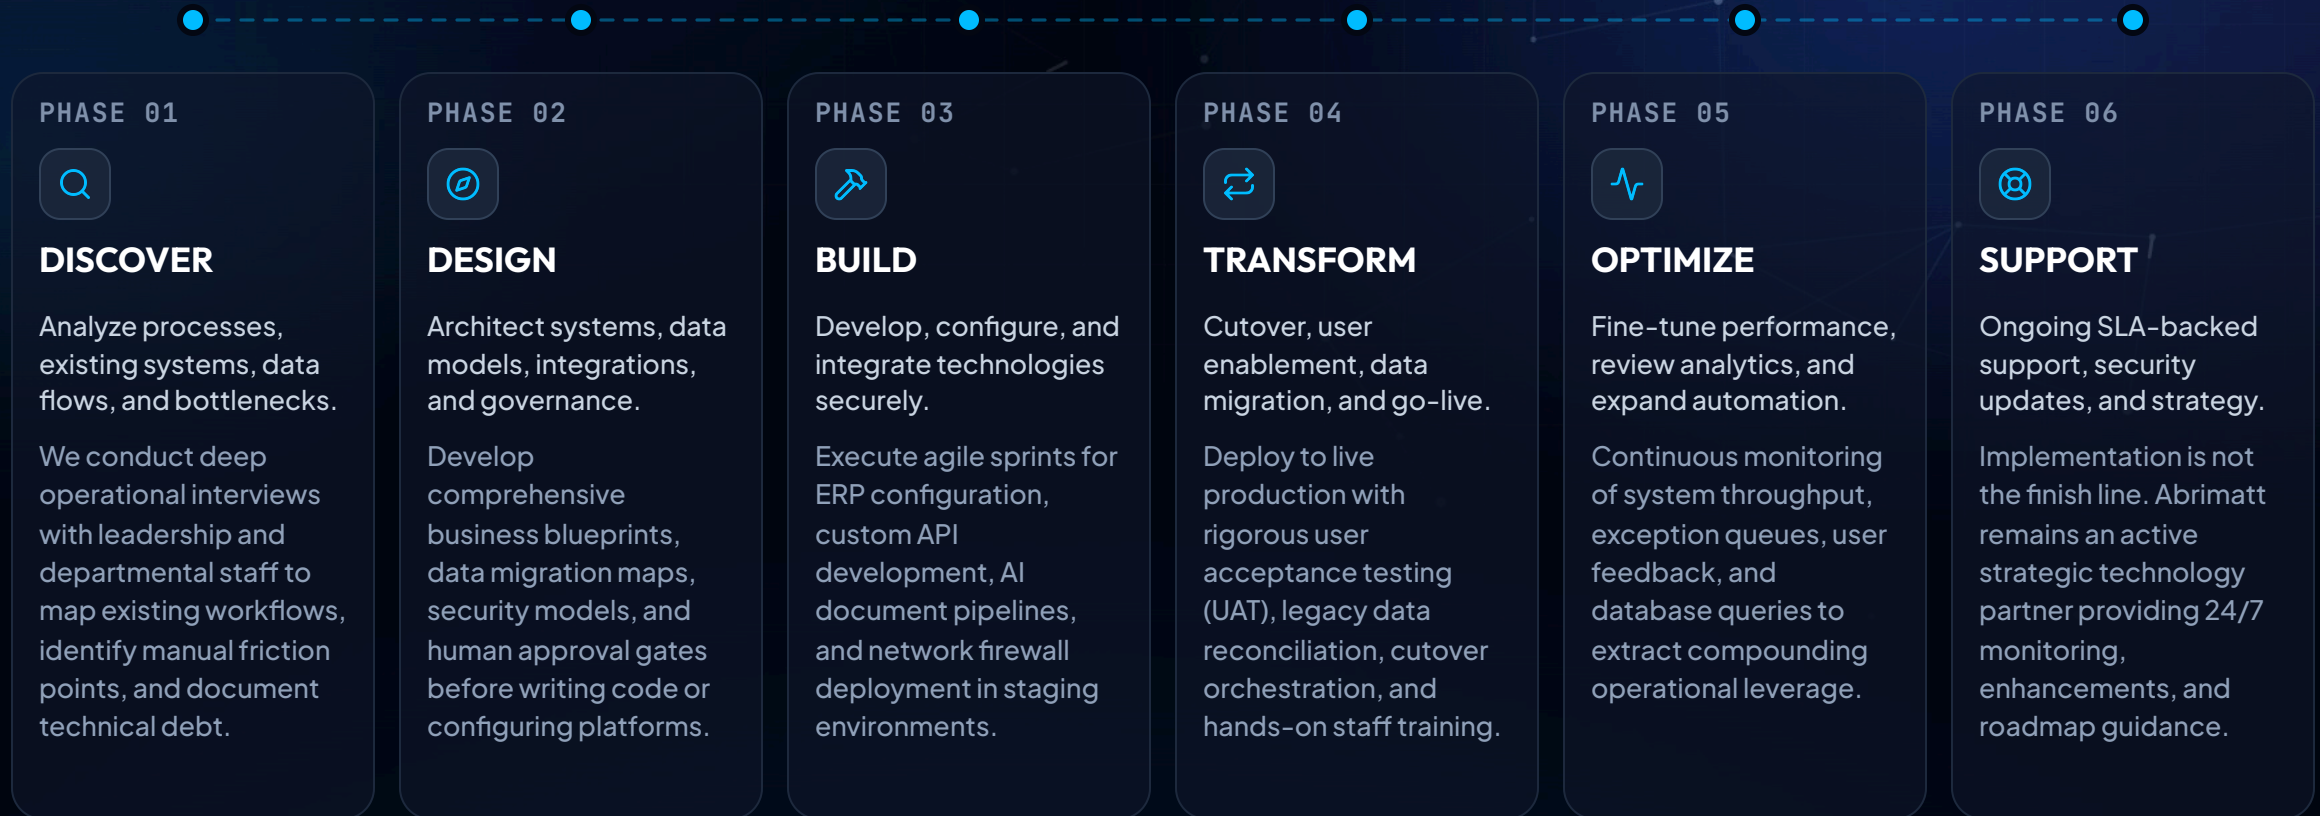

HOW WE ADVISE

Not tied to one vendor

We recommend what fits your business, which can include keeping what you already own.

Our six-stage delivery and partnership model

Dedicated principal consultant on every engagement

Clear milestones, fixed deliverables, and transparent TCO

Full documentation and complete client source code ownership

Technology built around business outcomes

Operate More Efficiently

Automate repetitive processes and simplify complex workflows.

Eliminate duplicate data entry across departments and replace manual spreadsheet handoffs with straight-through digital execution.

Make Better Decisions

Connect data and analytics to improve management visibility.

Gain instant visibility into inventory valuation, operational costs, customer profitability, and cash flow forecasting in real time.

Scale With Confidence

Build technology foundations that support growth.

Establish robust SAP enterprise backends and cloud infrastructures engineered to handle expanding order volumes without performance degradation.

Protect Your Business

Strengthen security, resilience, and operational continuity.

Deploy multi-tier perimeter firewalls, automated endpoint detection, and air-gapped backups that shield operations from ransomware extortion.

Create Better Customer Experiences

Build connected digital experiences across customer touchpoints.

Synchronize point-of-sale transactions, web storefronts, customer billing, and service communication into a frictionless brand journey.

Transform Continuously

Create a technology environment capable of evolving with the business.

Avoid brittle, single-purpose software silos by adopting modular API architectures that adapt as market requirements evolve.

Case studies: from operational friction to working systems

MANUFACTURING & DISTRIBUTION

Multi-Entity ERP Consolidation & Financial Harmonization Framework

A group of branches brought onto one ERP, so that its books are closed from one set of records.

WHAT WE DID

We designed one SAP Business One system for all the business units, with automatic intercompany postings and a single group chart of accounts.

- ✓ One database in place of several separate legacy systems
- ✓ Intercompany transactions posted and balanced automatically
- ✓ Stock visible across every warehouse, with serial-number tracking

LOGISTICS & SUPPLY CHAIN

Intelligent Document Processing & Automated Ledger Ingestion

Freight paperwork read by software and checked against the ERP, with people reviewing only what looks wrong.

WHAT WE DID

We built a document pipeline that reads the layout, extracts the fields with language models tuned to the sector, and checks them against the ERP with fixed rules, passing exceptions to a person.

- ✓ Manual retyping of high-volume freight documents removed
- ✓ A complete digital audit trail, with the original document shown beside the data taken from it
- ✓ Each document checked as it arrives, instead of waiting in a queue

HOSPITALITY

Unified Hospitality Operations & Real-Time POS Synchronization

Front desk, restaurant and room inventory kept in step, so that one bill reaches the guest.

WHAT WE DID

We put StayQuora property management together with the Cliq Restaurant Management till, so that guest folios, restaurant tabs and room inventory stay in step in both directions.

- ✓ Dining and room-service charges posted straight to the guest's room folio
- ✓ Night-audit reconciliation largely automated, so that the front desk closes the day faster
- ✓ A direct booking engine that shows room availability as it changes

START A CONVERSATION

Let's build what comes next.

Whether you are modernizing a business system, introducing AI automation, moving to the cloud, strengthening cybersecurity or building a new digital product, Abrimatt can help you define the right technology path.

WHAT HAPPENS NEXT

01 You tell us where you are

What you run today and what is getting in the way. A few lines are enough.

02 We come back to you

A consultant replies by email or telephone to talk through your situation and the options.

03 You decide what comes next

You leave with a clear picture and a recommended scope to take to your team. Nothing is committed until you say so.
